SUMMARY

IT and software development professional with experience in IT support, Microsoft 365 administration, and custom application development. Skilled in C, C++, C#, Java, Python, HTML, CSS, JavaScript, SQL, PHP, and Power Platform, with a solid grounding in networking. Strong problem-solving, teamwork, and adaptability skills. Seeking opportunities in software development (front end or back end), web development, or IT operations.

EDUCATION

Diploma – Software Development and Applications / Web and Video Game Design, IEK Omiros

Diploma – Computer Technician, DIEK Haidari

Relevant coursework: Programming, Software Engineering

TECHNICAL SKILLS

Programming: C, C++, C#, Java, Python, HTML5/CSS, JavaScript, SQL (PostgreSQL), PHP, Bash

IT & systems: Microsoft 365, Active Directory, Windows 10/11, iOS, Power Platform, ManageEngine ServiceDesk (ITIL), networking fundamentals

Certifications: Android Development (Android Studio); Introduction to Cybersecurity (Cisco)

PROFESSIONAL EXPERIENCE

Lamda Development, Greece — Service Delivery Associate

April 2025 – Present

- Provide first-level IT support to local and remote users across the corporate infrastructure, handling hardware incidents (PCs, printers, scanners, mobile devices) and software incidents (Windows, MS Office, Microsoft 365).
- Log, track, and escalate incidents and service requests in ManageEngine ServiceDesk, following internal ITIL-based procedures.
- Configure and deploy new workstations, mobile phones, and accessories according to company IT policies, and maintain an accurate IT asset inventory.
- Monitor the corporate IT infrastructure and coordinate with second-level support and vendors to ensure service availability and incident resolution.
- Manage user accounts and group policies in Active Directory, including user provisioning and access rights.
- Communicate clearly with technical and non-technical users throughout the incident lifecycle.
- Contribute to regular inventory and audit reports for hardware and software assets.
- Troubleshoot and support Windows 10/11, iOS, Microsoft Teams, SharePoint, Outlook, and other Microsoft 365 services.

Media Time IKE, Greece — IT Support Technician

June 2023 – March 2025

- Provided IT support for a media company, keeping broadcasting systems, networks, and IT infrastructure running smoothly.
- Troubleshot hardware and software issues, managed Microsoft 365 accounts, maintained security protocols, and supported end users with technical problems.

Hellenic Navy, Greece — Electronics & Automation Technician

November 2020 – April 2022

- Maintained and repaired electronic and communication systems in a military environment.

- Diagnosed technical faults, ensured the operational readiness of critical systems, and performed preventive maintenance on naval equipment.
- Worked under pressure while following strict protocols to ensure efficiency and security.

Public, Greece — IT Technician

June 2020 – November 2020

- Provided technical support at a major electronics retail chain, assisting customers with IT-related issues, product setup, and troubleshooting.
- Diagnosed and repaired hardware and software problems, managed warranty claims, and configured new devices for customers.

OTE, Greece — Computer & Network Technician (Intern)

September 2019 – February 2020

- Installed, configured, and maintained network infrastructure for Greece's leading telecommunications provider.
- Supported enterprise and residential customers with internet, VoIP, and networking issues, ensuring minimal downtime.
- Carried out troubleshooting, testing, and upgrades of networking hardware.

ACADEMIC PROJECTS

Python – Password Manager

C++ – Battleship Game, Card Game

C# – Ping Pong, Traffic Light
